## O'KEJOS GARBAGE SHOW (50min)

WASTE MANAGEMENT PERFORMANCE, IN THE SHADOW OF TV'S WITH THEATRE, CIRCUS AND MUSIC.

„Some people say recycling is ok. Some say is not ok. And I say fine, ok, ok to recycling today. I also say art of trash is important in the world of creation of the nation of the reorganization of the world as we seek to find. Amin“

In sorting repository: tons of garbage are setting the life tone. New sets of old trash. Red to red, white to white, plastic to plastic and paper to paper. A group of dusty figures living in a sorting house brings to life found objects and misuse them. Tv installation set, forlorn dummies and thousands of bottles establish a non-existing (though very possible) landscape. Recycled sounds on the old bicycle, jugs as well as live instruments such as saxophone, double-bass, didgeridoo... accompanies them in action.

Everything in the performance comes from recovery of the waste: found, recycled, brought back to life, together with the very performers. 'Our life is not easy, indeed. But we have found a way to survive. Alternative: collecting and renewal are natural human instincts. Let's collect garbage, let's live on it, let's eat it and what's the most important, let's create out of it !!! We, on the ship of waste, are going to sail towards new unknown recycled lands, seeking future, hope and freedom, in the name of common health and happiness.'

And with that optimistic ending, let us invite you to see the performance!

Techniques: bike acrobatics, aerials, contortion, club juggling, clown, physical theatre, multimedia.

### CAST:

Hubert Żórawski  
Katarzyna Donner  
Sara Skrajna  
Marta Kuczyńska

**DIRECTION:** Jacek Timingeriu i Marta Kuczyńska
